

2017 Legislative Brief

HB 394 by Representative Cox

The Problem

Industrial facilities that produce hazardous air emissions pose significant threats to the health and quality of life of adjacent residents. Currently, residents have limited information regarding potentially hazardous emissions present in their community.

The Solution

Protect communities by providing adequate monitoring and communication regarding potentially hazardous air emissions from **Title V** permitted facilities.

Proposed Law HB 394

Requires repeat offender facilities to implement fence-line air monitoring system

VOTE YES ON HB 394
